> about me

Front End Developer with a degree in **Web Application Development** and roots in **art direction**. Over five years designing for brands gave me an eye for UX, visual hierarchy and detail; now I bring that sensibility to code with **React, TypeScript and Tailwind**, building responsive interfaces end to end, from the Figma prototype to the last pixel.

> experience

Full Stack Developer @ Gpex
2025 – 2026 · Mérida

- Work-study internship (FP Dual) on a real project for the Public Administration of Extremadura, with modules for internal staff and citizen-facing services.
- Frontend and backend/database development with Java 8 and T-SQL, working in a team with SVN and Eclipse.

Art Director & Content Creator @ Miami Ad School
2020 – 2024 · Madrid

- Managed the corporate visual identity and created content for an international advertising creativity school.
- Art direction for communication projects, coordinating teams and keeping brand consistency across all formats and channels.
- Worked side by side with web developers, creating the prototypes for the websites they would build: **this is where my interest in development began**.

Art Director @ Brother · Mono · Groupe Renault
2017 – 2020 · Madrid

> projects

MOLegalSuite · Morán Ortiz Abogados
app.moranortiz.com

- Client web portal for tracking legal cases: a complete project, from the architecture and database design to the final responsive interface. **App in production: I can demo it in an interview.**
- Designed and built the law firm's corporate website (`moranortiz.com`) with WordPress and Elementor, based on my own Figma prototype.
